## Amerigo Announces Q2-2013 Copper Production Results

VANCOUVER, BRITISH COLUMBIA – July 12, 2013/CNW/ - Amerigo Resources Ltd. (TSX: ARG, "Amerigo" or the "Company") is pleased to announce production results for the second quarter of 2013 from Minera Valle Central ("MVC"), the Company's operations located near Rancagua, Chile. MVC produced 9.55 million pounds of copper and 0.176 million pounds of molybdenum during the three months ended June 30, 2013.

Dr. Klaus Zeitler, Amerigo's President and CEO, stated "As previously reported, a slide in one of the Colihues working areas necessitated a change to MVC's mine plan, and during the second and third quarters Colihues extraction rates and grades will be lower than originally anticipated. April copper production was 36% lower than that of April 2012, as production was limited to 22 days in the month. The revised mine plan began to show positive results in the last two months of the quarter, as June copper production was slightly higher than that for June 2012".

Rob Henderson, Amerigo's Chief Operating Officer, added "Production challenges in Colihues are expected to continue through Q3, with gradual improvement through Q4. Our production outlook for the year remains at the lower end of 45-50 million pounds of copper and 700,000 pounds of molybdenum".
