

BUSINESS OVERVIEW

Innovative, Long Term Copper Producer in Chile

Amerigo's business model is built on US\$300 million of investment since 2003 when Amerigo bought MVC. The operational objectives are to maximize production from fresh and historic tailings and manage costs to maximize margin. MVC has low sustaining capex requirements (US\$6 million per year) and predictable EBITDA and cash flow.

Amerigo is a pure copper play producer, highly levered to the copper price, poised to meet an annual production target of 61 million pounds of copper in 2021, and expected to generate EBITDA of US\$61 million at a copper price of US\$4 per pound.

Amerigo is in a strong financial position which has put the company in a position to return a significant amount of capital back to shareholders. Amerigo is returning capital to shareholders through quarterly dividends and share buybacks.
